

Only Cal Spas features the EIS eco-seal of approval

INCREASE THE GREEN IN YOUR BACKYARD & YOUR WALLET

There are three key components to a Green spa:

Cal Spas hot tubs use smart technology to run efficiently and use less energy!

Insulation keeps hot water in and cold weather out to reduce power needs!

Reduce chemical usage and keep water crystal clean at all times!

Only Cal Spas offers a complete Green package with eco-friendly features and options that include:

GEO GREEN ENERGY SAVER PACKAGE!

Efficiency

The efficient 24 Hour Filtration Solution™ circulates water through the filter and heater at a 36 gallons per minute while using less than 1/2 an amp of power

Insulation

Thermo-Guard™ Full Foam insulation keeps the heat in and the cold out

MANY WAYS TO GO GREEN!

Sanitation

The available Pure XL™ System treats water with UV light and is the most complete way to kill bacteria while maintaining smooth, fresh spa water

Insulation

Thermo-Layer™ cabinet blanket insulation provides an extra layer of protection from the elements

STANDARD EQUIPMENT!

Sanitation

The Green Pack 40/50™ lowers operating costs by using smart technology to lower heating consumption when booster pumps are operational. This allows operation of two pumps and a heater within standard 40 amp service.

Sanitation

The Bio Clean™ anti-microbial filter keeps the spa sanitized while minimizing chemical usage

Sanitation

The Pure Silk™ Ozonator kills bacteria through exposure to ozone while minimizing chemical usage

Insulation

Top off your spa with the Hydro-Armor™ tapered spa cover that provides the final layer of insulation and protection
